

With Nash's 2BE3/2BE4 ECO-FLO™ upgrade line, your water usage can be reduced by up to 50%

Existing Model	Seal Water Rate (GPM)		Annual Water Savings (gallons)	Estimated Annual Water Cost Savings
	Existing	New		
2BE3/4 30	24	12	6 million	\$3,150
2BE3/4 72	184	92	48 million	\$24,150
ECO-FLO Upgrade Investment → 12 Month Payback				

Sample savings. Figures are approximate.

Assumed:
50¢/1,000 gal H₂O
8,750 operating hours/year
Once thru operation @ 20" HgV

The ECO-FLO™ upgrade is available for the full range of 2BE3 and 2BE4 pumps

The engineers at Nash have brought new technology and innovation to your trusty NASH 2BE3 and 2BE4 pumps.

Nash has used its unrivaled knowledge of liquid ring pumping to improve the 2BE3/2BE4 design with new **ECO-FLO™ patent pending** technology. The results:

- Lower operating costs
- Same reliability, same performance
- A "green" vacuum pump

ECO-FLO™ Benefits:

- Higher vacuum capability
- Reduces water usage by up to 50%
- Improves handling of system upsets
- Inlet and discharge piping are unchanged - bolt in replacement
- Uses existing base, motor and drive
- Potential payback of less than 6 months
- Overhaul to exacting Nash standards at a Nash Service Center
- Available in both carbon steel and stainless steel
- Nash 2 year warranty

Let us show you how you can make your plant "greener." Contact us today.
